

Guttridge

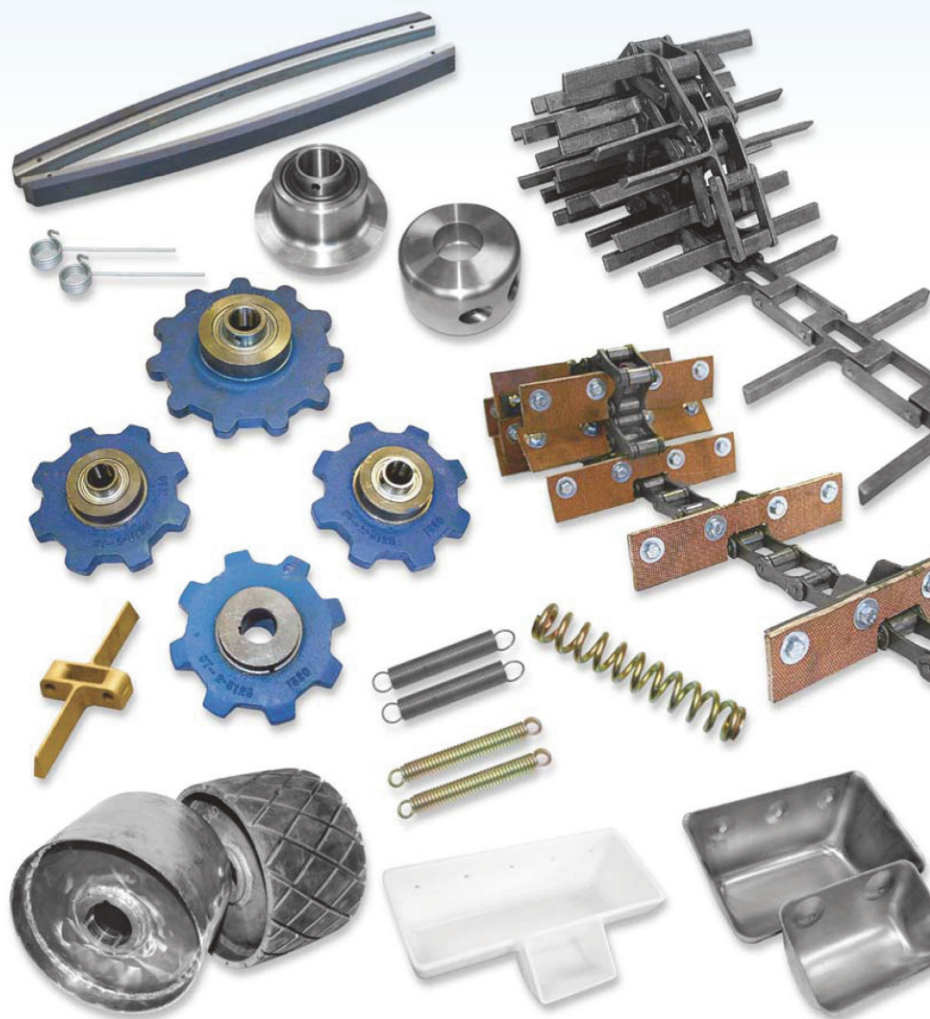

**All industries
All conveying**

Spares for all your conveying equipment

Founded over 50 years ago, Guttridge specialise in the design and manufacture of bulk materials handling machinery, serving a wide range of industries from grain, maltings and food, through to pharmaceuticals, aggregates and waste.

To support our equipment and meet the needs of our customers, we provide a knowledgeable, responsive spare parts service for Guttridge, Carrier and other brands of bulk materials handling machinery.

We can also provide quotations and advice for extensions and replacements to existing bulk materials handling machines.

Bulk Materials Handling

www.guttridge.co.uk

Spares for all your conveying equipment

We supply:

- Chain & flight assemblies
- Sprockets for all widths of conveyor, including deep case
- Loose chain connecting links
- Full range of shafts for elevators & conveyors
- Wear & noise reduction strips
- Conveyor cases, drives and tails
- Screw conveyor bearings, worm on pipes, replacement flights and casings
- Elevator & conveyor belting
- Elevator buckets, top & bottom drums, legs, outlets, heads & boots
- Replacement or new conveyor outlets with various types of slides, pneumatic, motorised, or rack & pinion
- Belt conveyor rollers & drums
- Springs for conveyor tensioning & outlets

Spares for chain conveyors

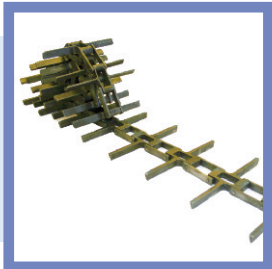

Roller Chain

Light series roller chain - mild steel, solid stud, bushed roller chain with integral steel flights available in multiple widths and a variety of strengths.

Drop Forged Chain

Drop forged (rivetless) chain – UTS drop forged chain with hardened brushes and bolted or welded flights available in multiple widths with a variety of strengths and pitches.

Scraper Chain

Scraper chains also available for use within most grain or feed industries.

Fabricated Casing

Casing – offered as an all bolted construction in standard lengths or to lengths to suit your requirements. Available in mild steel, galvanised and stainless steel.

Sprockets

Sprockets are available for all chain as required and can be supplied cast, steel or fabricated with welded or bolted segments.

We are able to offer all standard UK and ISO Chains including hollow or solid stud, roller and chains with welded or integral attachments.

Guttridge

Bulk Materials Handling

Belting and Elevator Spares

Belting

Belting choices - from laminated multi ply low stretch belts suitable for all bulk material handling applications through to specialised environments requiring belts for food quality or abrasive applications. Available in lengths and widths as required and supplied plain or punched to your specific requirements – suitable for elevating or conveying.

Elevator Buckets

We offer an extended variety of elevator buckets in a variety of materials from mild steel to nylon/polyethylene, all supplied plain or punched as required. Small to large volumes can be accommodated to handle materials as diverse as cereal and aggregates/cement. Whatever your requirement, we will endeavour to provide the correct solution.

Pulleys

Guttridge elevators and belt conveyors have standard range pulleys that are available from stock, either plain or lagged, with 10mm thick nitrile rubber. Using our on-site manufacturing capabilities, we are able to offer a wide variety of non-standard pulleys according to customers' specific requirements. We can also supply a large range of return rollers and roller sets for a wide variety of slip form or trough roller belt conveyors.

Bucket Bolts

Bucket Bolts are available in a variety of materials and sizes based upon your requirements.

Sensors

Belt alignment sensors, rotation sensors and a wide range of hazard monitors and level controls are available according to customer needs as well as safety zoning requirements.

Shafts and bearings are also available to suit multiple machine types and diameters. Guttridge's on-site fabrication facility, with state-of-the-art laser cutters, pressing capability and coded welders, can produce any required fabricated part for Guttridge and Carrier equipment as well as meeting other specific customer requests.

Spares for screw conveyors

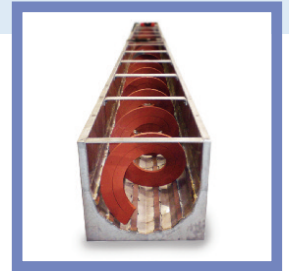

Standard flight segments pressed individually available to standard diameters or to individual requirement in mild or stainless steel. Also available in continuous spiral to suit our standard range of conveyors.

Hanger Bearings are available in multiple materials from phosphor bronze to ceramic with or without inserts to meet specific requirements.

We are able to offer worm on pipes as complete replacements to suit all machines supplied by ourselves and upon request to suit existing machines in a variety of configurations.

We are also able to supply a diverse range of replacement centreless spirals to suit customers' needs.

Spares in mild, stainless or galvanised steel for most conveying equipment and systems – please contact us for further information
