

# Belt Conveyors

**Guttridge Kleenbelt conveyor**

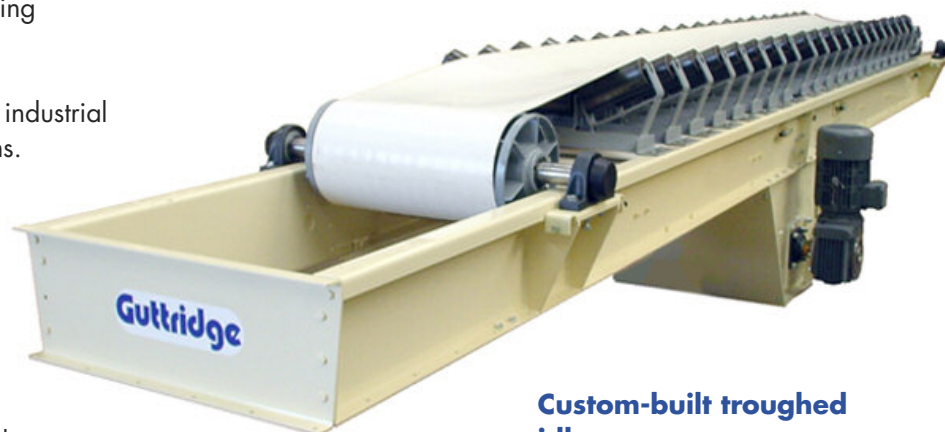

Belt Conveyors are one of the most common types of conveyor system in use today. The proliferation of belt styles and designs since the 1960's as new synthetic materials have become available has fuelled an enormous growth in applications for belt conveyors. The bulk handling industry now uses a huge range of different belt types - from flat through to chevron moulded and flexible wall styles allowing designers to specify a belt ideally suited to the application.

Guttridge offer three distinct ranges of belt conveyor featuring different configurations, each designed to suit the particular requirements of selected handling markets:-

- **Carrier Slip Form range:** ideal for light industrial and harvest duty grain storage applications.
- **Guttridge Troughed Roller range:** ideal for heavy duty grain storage, animal feed milling and general industrial applications.
- **Custom Heavy Industrial Kleenbelt range:** ideal where dust containment together with heavy duty design or special specification is required, usually custom-built to suit application needs.

Guttridge also specialise in special purpose belt conveyors designed and built to suit customers' particular requirements. Typical examples include very wide flat conveyors for slow moving unit loads, stainless steel units for applications such as hot foods, flexible wall units with bend sections for minerals and mobile flat belt conveyors for handling bags of animal feed.

A full range of optional extras, together with elevating, conveying equipment and ancillaries, is available with each range.

**Custom-built troughed idler conveyor**

## Specialist Manufacturers of Materials Handling Machinery

We serve a wide range of industry sectors with our comprehensive range of materials handling machinery. A full description of our complete range of products is beyond the scope of this brochure, but we list brief details below -

**Mobile flat belt conveyor**

### Feeds, Cereals, Chemicals, Minerals

- Screw Conveyors & Bin Dischargers
- Chain & Flight Conveyors
- Hiloal Bucket Elevators, Belt Conveyors
- Spouting, Fittings & Slide Valves
- Fountain Blenders/Live Bins
- Special Fabrications

### Foods, Chemicals, Pharmaceuticals

- *Easyflo* Mobile Screw Elevator
- *Sieveflo* Screw Elevator/Check Sieve
- *Multiflo* & *Augaflo* Screw Conveyors
- *Bulkflo* Mobile Loading Hopper with integral Screw Elevator

A range of machines designed to be easily dismantled for cleaning

Our machinery is in regular use all over the world and we have Agency and Distribution Agreements with companies in many different countries. Please contact us for further details.
