

Guttridge

Spare Spirals and Linings for all brands of Centreless Screw Conveyors

Spare Spirals and Linings

As well as supplying complete centreless screw conveying solutions, we are now offering a range of replacement spirals and linings for existing machines of any brand of centreless screw conveyor routinely used in the UK.

Spiral Options:

Any diameter and pitch from 80mm to 600mm.
Mild Steel or Stainless Steel
Single, double or triple flight geometry

Linings:

A choice of lining materials and thicknesses are available.

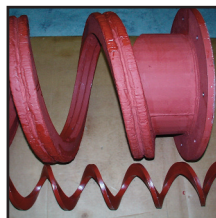

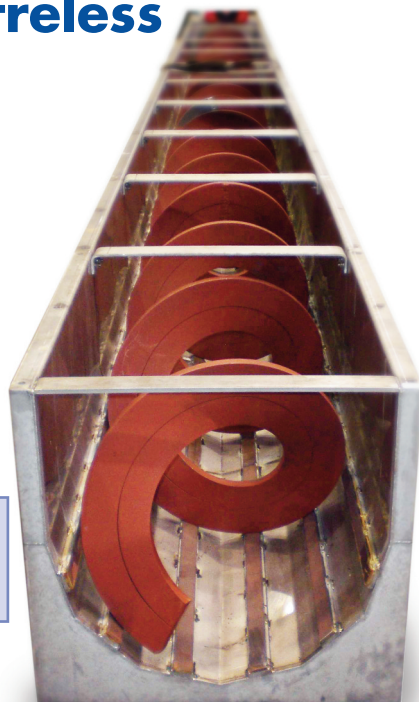

Contact us on 01775 765300 to discuss your spares requirement with a member of our engineering team or email us on info@guttridge.co.uk

Guttridge Centreless Screw Conveyors

Centreless Screw Conveyors are especially suitable for transport of materials that have a tendency to stick to the shaft. Materials with changing particle size and consistency can be transported without problems in this type of conveyor. Typical applications are:-

- Waste Water Treatment
- Industrial Waste
- Pulp and Paper
- Vegetables and Waste Foodstuffs
- Sewage Sludge
- Chemicals
- Biomass

Guttridge apply a wealth of experience and expertise to provide fully customised solutions tailored to specific customer requirements whether that be single conveyors or complete screw conveyor systems.
