

Guttridge

Guttridge are the leading UK manufacturer of bulk materials handling machinery with a large installed base throughout the UK and across the world.

Guttridge is about people, know-how, dependability and technical expertise; about solutions to every customer's unique needs and about clients who range from the smallest to the UK's largest household name companies.

Underpinning our success is a committed and loyal work force, of whom we are justifiably proud. Their high levels of skill and experience are available to serve you with the very best in engineering capability.

At Guttridge we have an unswerving commitment to investment - investment in modern plant and machinery coupled with the very latest in design and manufacturing technology. Our modern factory is designed for efficient manufacture on short lead times.

- **Experienced proposals engineers who stick with you from concept to delivery**
- **Vastly experienced design engineers who produce the very best in standard, custom and bespoke solutions**
- **Highly skilled factory workers organised into customer driven teams where ownership and flexibility produce equipment to your timescales**
- **All adding up to Guttridge people producing high quality, bulk materials handling solutions, delivered on time, at the right price, to satisfied customers.**

Visit our website www.guttridge.co.uk for product information, design notes, downloads, advice on ATEX and useful links to other organisations involved in bulk materials handling.

Or call **01775 765300** for a detailed brochure pack including product information, application notes, dimensions and flow rates.
